

J-B Weld Tank Weld

RJB8217

Details

TankWeld Fuel & Metal Tank Repair Kit is a steel-reinforced, non-rusting epoxy putty stick that quickly repairs or rebuilds anything made of metal. This industrial-strength polymer compound can be molded into shapes or used to build up, patch and repair steel components. No welding required. Five minute set up time, 60 minute cure, ready to be drilled, tapped, machined, ground, filed and painted. Great for all metals, gas tanks, radiators, lawn equipment, water tanks, fiberglass. Withstands temperatures up to 300F. Dark grey. 900 PSI. Made in U.S.A.
